

EQUUS
P L A T F O R M

BUILD RELATIONSHIPS WITH MEMBERS BASED ON KNOWLEDGE, QUALITY, EFFICIENCY AND CONFIDENTIALITY

- › Complete platform
- › Work efficiently, safely, online everywhere
- › For studbooks and central government
- › Payable for large and small organizations
- › Simple to use
- › Flexible to set up
- › International
- › Always up-to-date
- › Respond to customer needs
- › Increase sales
- › Reduce member outflow
- › Complies with EU-regulations
- › Excellent support
- › Software Escrow included
- › Most used registration platform worldwide

- › Members
- › Consultants
- › Inspectors
- › Vets
- › Breeders

› Studbooks

Countries

A. BACKOFFICE

This is where the data and documents coincide, where studbook employees can carry out their daily tasks efficiently by using the clear visual interface which gives great control over their data and tasks and provides insights into the necessities for building and improving a strong member relationship

- › Member management
- › Breeding farm
- › Management information
- › Sport
- › Finance

B. FRONTOFFICE

Use your own comprehensive website with your studbook's public information, which is also where your members can register and have access to all the features included, like gathering information about their horses, breedings, inspections, updating personal information, inspection registration and much more.

- › Public information
- › Member self-service
- › Marketing

C. HORSELINK

Use HorseLink for searching the I&R data of a horse stored in another database in case the original passport is missing by using the UELN and/or the microchip number. In case of a mutual agreement a complete dataset (e.g. name, gender, age, pedigree) can be transferred.

- › By UELN
- › By Chip number

D. APPS

Take advantage of the connectivity between internal and external processes which comes in the form of EQUIS apps. They facilitate the necessary processes in and around a studbook and provide mobile and real-time solutions for an even better member service, such as following your own breeding product during competitions or looking up information about specific horses.

- › Foal sketch
- › Inspections
- › Members

E. INTEGRATIONS

Selected parties can exchange real-time data with the EQUIS platform. Horse related data registered by third parties can get exchanged, for example DNA. The integrations achieve simplification, insight, efficiency and improves the service level.

- › WBFSH
- › Government
- › Laboratories
- › Sport federations
- › Value Added Resellers

DATA EXCHANGE by HORSELINK

Project developed by Delta Horses

Organisations who join the project:

- Netherlands, Studbooks working with Delta Horses (EQUIS platform)
- Luxembourg, Government and the Luxembourg Studbooks (Equis platform)
- France, Ifce
- Romania
- BWP (Belgium, Equis Platform)
- KWPN North America (Equis Platform)
- Expected to join (Equis Platform): CWHBA (Canada), NW (Norway)

Context:

- Replaces the former WBFSH/WHIRDEC Hub Project (since 2017)
- Data exchange only → NO DATA TRANSFERED OR STORED
- Access rights by owning organisation as well as the content of the dataset
- Search and access to horse data by microchip number and/or UELN

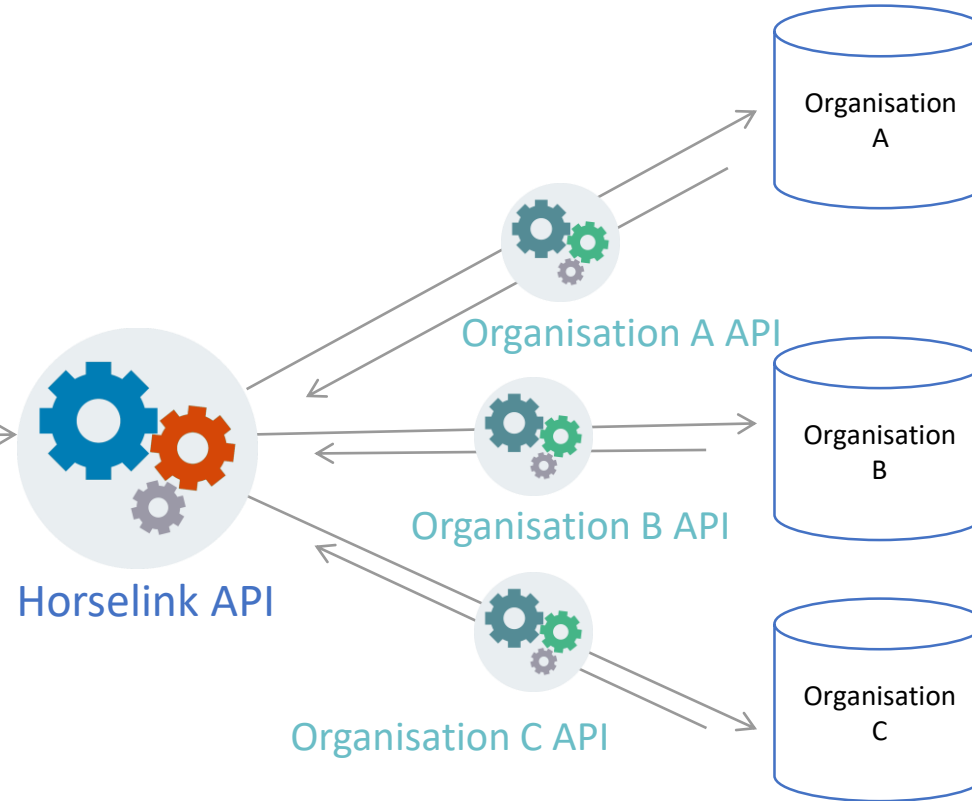

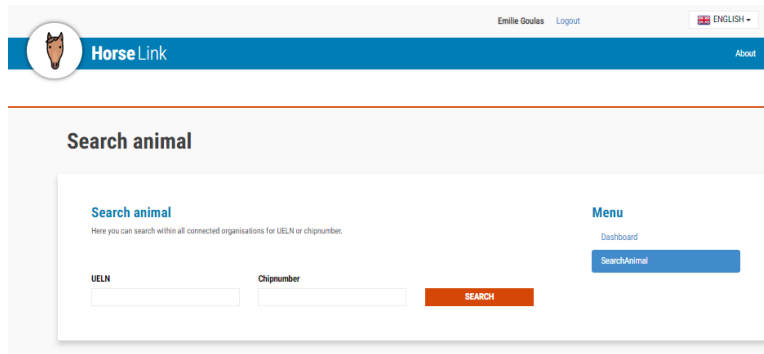

→ If the horse is registered in more than one database, the information from each database is displayed

Project developed by Delta Horses

4 Features

- Step 1: Search for a horse by UELN and/or Microchip number
- Step 2: Get data from a horse (if allowed by owning organization)
- Dashboard of incoming and outgoing requests
- Management of access rights (Outgoing and incoming Organisations)

Available horse's information:

- Name, gender
- Date of birth, Date of death
- Human consumption status
- Passport issuing body : Y/N
- Pedigree

Project developed by Delta Horses

Perspectives

- Anyone who wants to join the project only needs to develop webservice to plug on the HorseLink Interface for access of the database
- API is based on JSON, XML compatibility available on request
- Primarily used for data exchange between National Data Bases and/or Studbooks and only for I&R issues
- First phase of the pilot -> only providing (showing) data on the interface
- Real data exchange can be done in a second phase
- Dataset can easily be improved or extended

Project developed by Delta Horses

If you wish more info, a detailed Demo or to join the project, please contact us:

- whirdec@ifce.fr
- emilie.goulas@ifce.fr
- max@deltahorses.nl

(Joining the project is free up to 31 December 2021)
