

E-Passport

The power of the platform

 WEATHERBYS

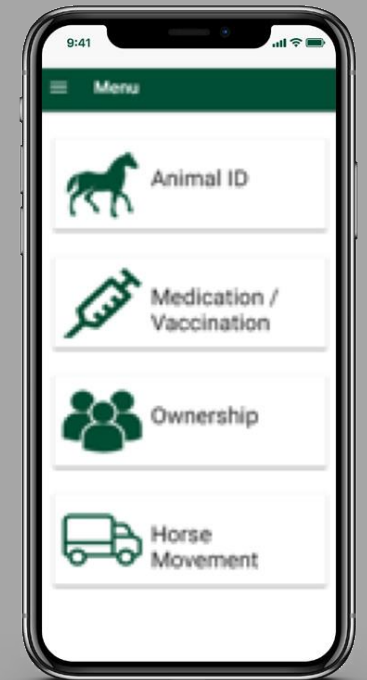

Digital Solution

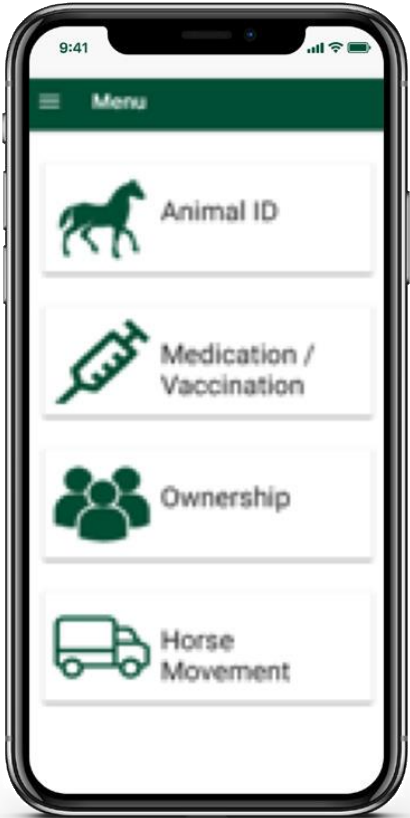

Why?

New improved systems and ways of working

- Cost-efficiency
- Available 24/7
- Accelerated registration and improved customer experience
- Real-time registration and reporting of ID, movements, changes of ownership, vaccinations etc
- Full data audit trail
- Improved traceability
- Improved biosecurity
- Improved welfare
- Improved compliance
- Secure data, more data and better quality data
- Easier movement

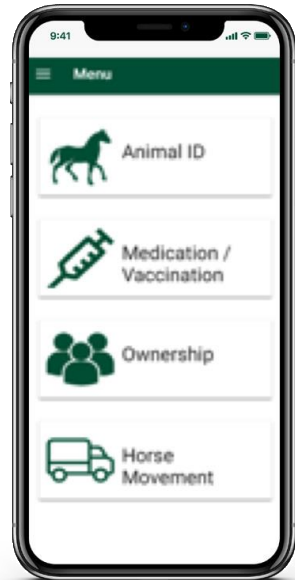

Cutting edge breeding industry technology

Cutting edge breeding industry technology

E-PASSPORT

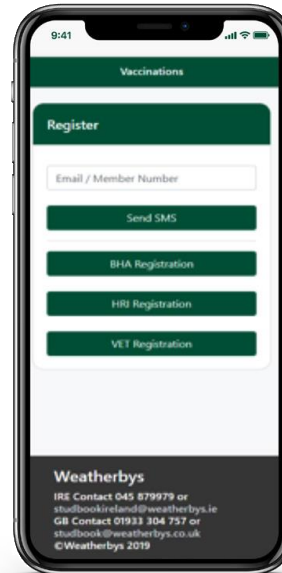

A single platform for equine **identification, ownership, movement and vaccination & medical records** in a safe and secure digital environment.

- Real-time, Secure, Verified
- Traceability, Welfare and Biosecurity

[Click to view video](#)

VACCINATION APP

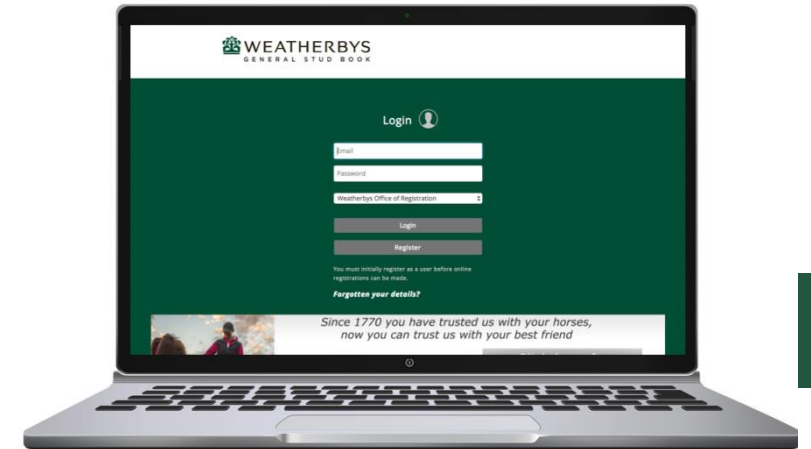

- All vaccination records located in one digital platform
- Data connectivity to the PIO, Competent Authority and Industry Regulators
- Automated vaccination tracking service
- Capability to provide updates & reminders to owners, trainers and regulators

[Click to view Vets video](#)

[Click to view Trainers video](#)

MOVEMENT APP

- Accessible to All Registered Equine Animals
- Secure animal search linked to UELN (data repository) - information cross-referenced in real time
- Movement application automated and status assigned for EHC (export health certificate)

DIGITAL MOVEMENT FLOW

Customs officers, shippers, regulators and vets can check health status, medications and vaccination records, ownership, previous locations and future destinations for the horse online. With the option for preclearance in advance entry or exit from a specific holding or premises all information collected is visible in real time. The geo-location functionality provides key data for interrogation and restricts certain data – for example, health certificates – to be viewed only as complete at border crossings on validation by the respective authorities.
